Fly Tie-a-thon

There are multiple ways to participate in this event designed to raise money for March of Dimes:

1. "Tie-a-thon" tiers are asked to tie for 9hrs and to obtain sponsorships for their tying from corporations or individuals. A minimum sponsorship of \$50 is requested. Tie-a-thon tiers will receive a "goody" bag.
2. Interested tiers not able to tie for 9 hrs are welcome to participate for as long as they can; any sponsorship money they can provide is appreciated.
3. Monetary donations toward the cause by non-tiers are welcome.
4. Come to the Tie-a-thon and purchase flies tied during the event.
5. See the website for corporate sponsorship options: Gold \$500, Silver \$250, & Copper \$150 levels available.

Learn new techniques, patterns, etc.; enjoy the camaraderie of other tiers. All flies tied during the Tie-a-thon that are not sold as fundraisers, will be donated to Casting For Recovery.

For sign-up forms contact:

Keith Gallaher FlyTieathon@gmail.com;
checks should be made payable to MOD
and are tax deductible

Donations can also be made directly
through the web :

PERINATAL DATA SNAPSHOTS:

North Carolina Maternal and Infant Health Overview

In an Average Week in North Carolina^{1, 2}

2,520 babies are born	290 babies are born to teen mothers (ages 15-19)	768 babies delivered by cesarean section	336 babies are born preterm	232 babies are born low birthweight	20 babies die before their first birthday
---------------------------------	--	--	---------------------------------------	---	---

North Carolina and US Year 2010 Objectives^{1, 2}

Indicators, North Carolina

Indicator	Number	Rate
Births ¹	131,037	69.6
Adequate/Adequate+ PNC ¹	99,837	77.9%
Early Prenatal Care ¹	105,698	81.7%
Uninsured Women (15-44 yrs) ³	NA	22.4%
Uninsured Children (<19 yrs) ³	NA	11.5%
C Section ¹	39,937	30.7%
Preterm ¹	17,472	13.3%
Very Preterm ¹	3,234	2.5%
Late Preterm ¹	12,016	9.2%
Low Birthweight ¹	12,080	9.2%
Very Low Birthweight ¹	2,396	1.8%
Infant Mortality ²	1,035	8.1

Footnotes

- Adequate/Adequate+ prenatal care (PNC) is measured using the Adequacy of Prenatal Care Utilization Index and takes into account timing of prenatal care, number of visits, and infant's gestational age.
- For more information on U.S. 2010 objectives, visit <http://www.healthypeople.gov>.
- Birth rate is live births per 1,000 women aged 15-44 years.
- Early prenatal care is pregnancy-related care beginning in the first trimester (1-3 months).
- NA = Not Available.
- Very preterm is less than 32 completed weeks of pregnancy. Late preterm is between 34-36 weeks of pregnancy.
- Very low birthweight is less than 1500 grams (3 1/2 pounds).
